

# ACCESSORIES

## RFID INFRASTRUCTURE TOOLS

ELATEC offers accessories for optimized RFID applications. There are tools for connecting an RFID reader to an existing Ethernet network as well as for setting up and diagnosing RFID environments.

### CONNECTING AN RFID READER TO AN ETHERNET

These devices enable RFID identification on single function printers and other devices over Ethernet (reader required):

### TCP3

#### FEATURES

- + Acts as an Ethernet network switch

### SETTING UP AND DIAGNOSING RFID ENVIRONMENTS

### TECHTRACER LITE\*

#### FEATURES

- + Enables on-site identification of RFID card technologies
- + Supported frequencies: 125 kHz, 13.56 MHz, NFC
- + Compact dimensions
- + Recognizes more than 60 RFID technologies

### TWN4 CONFIG PROGRAMMER KIT

#### FEATURES

- + Saves custom reader configuration to TWN4 Configuration Card
- + The TWN4 Configuration Card can apply a custom configuration to a reader by a single card swipe
- + Enables large reduction of in-field service support costs

\* LEGIC version available

For exact specifications of each reader, please refer to the corresponding data sheet.
